TechDiscovery...
Capturing ideas.
Delivering solutions

“Healthcare
innovation requires
more than
programming”

TechDiscovery offers
services and support
beyond software
development. We
are partners,
strategy advisors
and IT consultants

Technology Consulting Services for the Healthcare Industry

TechDiscovery understands the challenges facing the healthcare industry, and has the proven expertise in leveraging existing assets and new technologies to design and implementing cost-effective IT solutions. In addition, we can assist with achieving and maintaining ongoing compliance, managing user access, protecting sensitive information, and developing business continuity and disaster plans. TechDiscovery feels strongly that a clinical team directly involved with IT is the best solution to determining what is best for healthcare providers and the community at large.

Our services include:

HIS Technology Roadmap and Product Planning	TechDiscovery helps develop technology roadmaps and application/product plans to ensure that technology is aligned and balance with financial and patient care goals. This planning ensures that the pace of evolution, technology improvement, and delivery timelines are in line with realities, clinical programs, and strategic plans.
Portfolio Management	TechDiscovery helps clients balance demand and supply of IT resources, promote alignment with healthcare organization goals, reducing redundancy and identifying cost saving opportunities. TechDiscovery assists clients in making important decisions on existing applications and the level of resources required to support them.
Enterprise IT Workforce Optimization Services	TechDiscovery's Enterprise IT Workforce Optimization services include a comprehensive array of assessments to provide a planned and structured strategy to increase efficiency, leverage opportunities and reduce costs.

<p>Application Assessments, Audits, Health Checks & Due Diligence</p>	<p>TechDiscovery provides assessments, audits, health checks and due diligence services covering application architecture, design and security, as well as re-engineering or re-platforming of legacy applications.</p> <p>Outcome of these services include:</p> <ul style="list-style-type: none"> - Reports that address the needs of both senior managers and technical staff - Executive summary that summarizes security exposures discovered in the assessment and potential impact upon the organization
<p>EMR/HIS Products and Services Review</p>	<p>TechDiscovery can develop, review, and define sourcing and procurement activities for an IT organization from a simple one-time RFQ to a complex multi-stage RFI / RFP / RFQ process.</p> <p>TechDiscovery advises and helps clients maximize success with RFX thru centralized repository, templates, common-sense formatting, workflow capability, data export, security and access control.</p>
<p>HIS IT Governance</p>	<p>TechDiscovery helps implement IT governance to include processes, reporting relationships, roles, and committees that enable an organization to make decisions and manage execution.</p> <p>TechDiscovery’s focus surrounding governance is on issues such as:</p> <ul style="list-style-type: none"> - HIPAA Compliance - Determining the distribution of responsibilities for making decisions - Defining the roles that various organizational members and organizational committees have for IT - Developing IT-centric organizational processes for making decisions - Defining policies and procedures that govern organizational use of IT

Healthcare organizations must incorporate the diverse operations of hospitals, physicians, mobile care givers and clinics, while maintaining the highest levels of patient care and employee productivity. Include the industry’s uncompromising service levels and new regulatory requirements, and the financial constraints can be equally challenging.

TechDiscovery is confident that its comprehensive array of Technology Consulting Services can strongly contribute to the success of your organization
